

# Luca Bogani

## Senior Full-Stack Web Developer

I am a full-stack web developer with 9+ years of experience, driven from an early age by a strong passion for creation and innovation. I have developed solid **teamworking** skills by operating in structured environments and adopting **Agile/SCRUM methodologies**. Over the last two years, I have also worked on the development of **AI solutions** in enterprise contexts, contributing to the **design and integration** of intelligent systems within existing platforms. I am constantly seeking stimulating challenges that allow me to grow professionally by experimenting with **new problem-solving approaches**, and I maintain a strong focus on continuous learning through the study of new technologies and regular participation in industry events, also aimed at expanding my **professional network**.

## Experiences

Sept 2023 - Today

Bene Assicurazioni SPA | Seregno | Hybrid | Employee

### Senior Developer

Responsible for the design and development of **web-based solutions** supporting agents in customer portfolio management and management teams in agency network governance. I led and significantly contributed to the development of **AI agents in Python**, based on OpenAI, with advanced **workflows** built using LlamaIndex, supporting policy issuance processes. I designed and implemented **RAG solutions** on **AWS Bedrock** for product underwriting (CGA), as well as **Text-to-SQL** systems, **ETL** pipelines, **microservices** architectures, and **serverless** components using AWS Lambda, collaborating closely with both business and technical stakeholders.

Feb 2023 - Gen 2025

Freelancer | Full Remote

### Full-stack Developer

As a freelance full-stack developer, I have worked on various projects, handling the entire development cycle from **design** to **implementation** and **deployment**. I have collaborated with a range of clients, including startups, agencies, and enterprises, to create customized solutions tailored to their specific needs. I am capable of working independently or within a team, utilizing the latest technologies and industry best practices.

Jan 2022 - Feb 2023

Friendz Enterprise srl | Startup | Milan | Hybrid | Employee

### Full-stack Developer

Development of SaaS solutions for brand community management. I have been responsible for developing and maintaining several proprietary products and technological solutions, with a team of 8 developers and UX Designers. Technologies used include **Docker**, **MySQL**, **Laravel**, **AWS**, and **REST APIs**.

Mar 2018 - Jan 2022

Lovby srl | Startup | Milan | Hybrid | Employee

### Junior App Developer

I contributed to the creation and development of the **Lovby app**, a platform where users can engage in promotional activities for brands they prefer and appreciate. In return, they receive virtual points that can be redeemed for rewards. The app had over 500k users. I worked within a team of developers and UX Designers. Specifically, my responsibilities included developing **REST APIs**, **the Web App**, and **the iOS application**. Technologies utilized encompassed **MySQL**, **.NET Framework**, **Ionic Cordova**, **Angular**, and **IIS**.
